Premiere shortcuts that pay rent.

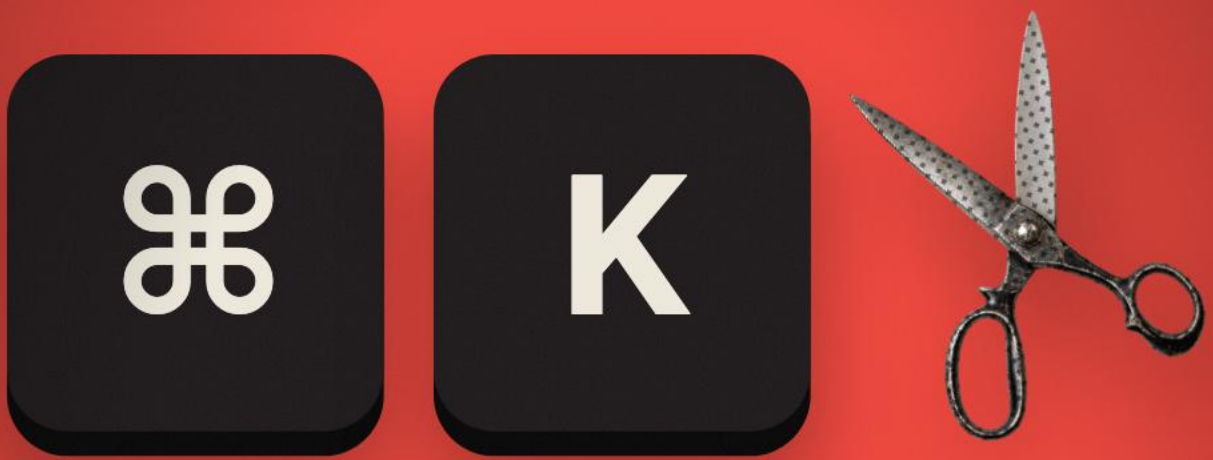

Default keyboard. Save this.

ripple *trim.*

Ripple trim the clip start or end to the playhead. The fastest rough cut there is.

add *edit.*

CTRL + K ON WINDOWS

Add edit at the playhead. Our favourite. It's in our name.

all tracks.

SHIFT + CTRL + K ON WINDOWS

Add edit on every track at once.

A

track *select.*

Track select forward. Grab everything after the cursor and make room.

F

match *frame.*

Match frame. Jump to the source clip of whatever's under the playhead.

maximise.

Maximise the panel under your cursor.
Full-screen timeline, one key.

shuttle.

Reverse, stop, forward. Tap L twice for 2× speed.

learn one a day. *not* all seven.

Save this. Follow @cutcult.in for Day 16.
